STUDENT ADVISING

Individual advising on our degree programs is available from the student advisory service of each of our schools.

studienberatung.hs-mainz.de

GENERAL INFORMATION

Individualized, practice-oriented and international – these are the key characteristics of our university. Our range of academic programs is marked by strong links to professional practice in both teaching and research. Parttime and cooperative study programs make it possible for our students to combine their studies with professional activities.

An international climate is an integral component of life at our university. Exchanges with about 90 universities in Europe and around the world are important. Integrated international degree programs, internationally accredited master's degree programs and dual degrees, the encouraging of study abroad semesters, exchange programs for university staff and language courses to intensify students' foreign language competence all play a major role in this area.

Our university places particular value on maintaining a close relationship with its students. The good relationships between students and university teaching staff are supported by intensive advising, small class sizes and many joint projects.

BACHELOR'S/MASTER'S DEGREES

Our range of programs comprises 16 bachelor's and 22 master's degree programs. In three to four years, the bachelor's degree provides students with an initial academic qualification, and can open the door to a professional career or further qualification in the form of a master's degree program. The completion of the master's degree allows graduates to undertake a doctoral degree.
