GENERAL INFORMATION
Individualized, practice-oriented and international – these are the key characteristics of our university. Our range of academic programs is marked by strong links to professional practice in both teaching and research. Parttime and cooperative study programs make it possible for our students to combine their studies with professional activities.

An international climate is an integral component of life at our university. Exchanges with about 90 universities in Europe and around the world are important. Integrated international degree programs, internationally accredited master's degree programs and dual degrees, the encouraging of study abroad semesters, exchange programs for university staff and language courses to intensify students' foreign language competence all play a major role in this area.

Our university places particular value on maintaining a close relationship with its students. The good relationships between students and university teaching staff are supported by intensive advising, small class sizes and many joint projects.
School of Engineering

Architecture B.Eng.  
Architecture with integrated practical period B.Eng.  
Building and Property Management / Facility Management B.Eng.  
Civil Engineering B.Eng.
