

INFORMATION SYSTEMS

DUAL

Bachelor of Science

BUSINESS
HOCHSCHULE MAINZ
UNIVERSITY OF
APPLIED SCIENCES

PROGRAM OBJECTIVES

The degree program Information Systems dual B.Sc. combines vocational training and studies. The focus is on the planning, implementation, and use of IT solutions in companies: Infrastructures, software systems, and IT support of complex business processes are as central here as business management matters relevant for companies.

Computer science topics and economics topics are included in the program curriculum. These are supplemented by specific aspects of information systems.

PROGRAM STRUCTURE

The modules of the program are divided into three areas: IT/Computer Science, Information Systems, and Business Administration. Practical projects facilitate a more in-depth examination of individual topics. An international approach is possible through an optional semester abroad. Classes take place on a weekday and some Saturdays. This enables successful integration into the company's practices and processes.

PROSPECTS

The program concludes with the awarding of the academic degree Bachelor of Science (B.Sc.). This degree opens up a wide range of career opportunities. The fields of activity range from operational to strategic responsibilities. In addition, the Bachelor of Science is an accredited and international degree that qualifies students to pursue a master's degree.

AT A GLANCE

When to start

Winter semester

Standard period of study

7 semesters, on-the-job or in vocational training

Requirements

- For more information on application requirements, go to hs-mz.de/applying and see the degree program's homepage (link and QR code below)
