

Modulhandbuch

**Bachelorstudiengang
International Business B.Sc.**

Einführung und allgemeine Informationen

Liebe Bachelor-Studentinnen und Studenten,

liebe Studieninteressierte,

mit dem Studiengang International Business bieten wir Ihnen einen ersten berufsqualifizierenden akademischen Abschluss. Der Studiengang ist modular aufgebaut. Das bedeutet, dass er sich aus Modulen zusammensetzt, die einzeln geprüft werden. Nach Bestehen aller Module erwerben Sie den Titel Bachelor of Science in International Business der Hochschule Mainz.

Im vorliegenden Modulhandbuch finden Sie die Beschreibung der einzelnen Module. Es stellt daher die beste Grundlage dafür dar, den Studiengang zu verstehen. Denn die Modulbeschreibungen beschränken sich nicht nur auf den Inhalt der Module, sondern geben auch Informationen zum Workload, der Lehrsprache, der Lernziele, der Lehrmethode und vieles mehr.

Die Modulbeschreibungen lassen erkennen, dass die Studienstruktur in erster Linie darauf zielt, allgemeine Inhalte der Betriebswirtschaftslehre (BWL) zu vermitteln. Dazu gehen wir auf die klassischen Felder der BWL ein mit Blick auf aktuelle und zukünftige Themenbereiche. Darüber hinaus erwerben Sie Methodenkenntnisse im mathematisch und statistischen Bereich und erhalten den Einblick in den rechtlichen und volkswirtschaftlichen Rahmen. Besondere Aufmerksamkeit schenken wir der Vermittlung internationaler Kompetenzen: Neben dem individuellen Sprachangebot werden interkulturelle Kompetenzen in Modulen bzw. dem Auslandsstudium vermittelt. Die Module werden größtenteils auf Englisch gelehrt, in höheren Semestern werden einige Module auf Deutsch angeboten. Nach erfolgreichem Studium werden Sie eine solide Basis für Ihre weitere betriebswirtschaftliche Karriere in einer globalisierten Welt haben.

Je nachdem, wo Sie Ihre Hochschulzugangsberechtigung erworben haben (bzw. je nach Deutschkenntnissen), werden Sie einem Nationalen Track oder Internationalen Track zugeordnet. Beide Tracks unterscheiden sich im Wesentlichen bei der Sprachvermittlung und im 5. Semester.

Im Einzelnen finden Sie im vorliegenden Modulhandbuch folgende Information für jedes Modul:

- Informationen zur Prüfungsnummer des jeweiligen Moduls, Anzahl der zu vergebenen Credits, Angaben zu Workload und Gruppengröße;
- Hinweise zu Inhalt, Ziel, Lehrmethode, Prüfungsform, (inhaltliche) Teilnahmevoraussetzung und hauptverantwortlicher Lehrkraft der einzelnen Veranstaltung;
- Erste Literaturangaben sowie die geforderten, beziehungsweise angestrebten Sprachniveaus.
- (Formale) Regelungen und Prüfungsvoraussetzungen finden Sie in der Allgemeinen Prüfungsordnung und der Fachprüfungsordnung; diese gelten vorrangig.
-

Wir wünschen Ihnen eine erfolgreiche, lehrreiche und schöne Studienzeit.

Introduction and general information

Dear Bachelor students,

dear prospective students,

With the International Business Administration program, we offer you a first professionally qualifying academic degree. The degree program has a modular structure. This means that it is made up of modules that are examined individually. After passing all modules, you will be awarded the title Bachelor of Science in International Business from Mainz University of Applied Sciences.

In this module handbook you will find a description of the individual modules. It is therefore the best basis for understanding the degree program. This is because the module descriptions are not limited to the content of the modules, but also provide information on workload, teaching language, learning objectives, teaching methods and much more.

The module descriptions indicate that the course structure is primarily aimed at teaching the general content of business administration. To this end, we deal with the classic fields of business administration with a view to current and future subject areas. In addition, you will acquire methodological skills in mathematics and statistics and gain an insight into the legal and economic framework. We pay particular attention to teaching international skills: In addition to the individual language offer, intercultural skills are taught in modules or study abroad. Most of the modules are taught in English, with some modules being offered in German in higher semesters. After successfully completing your studies, you will have a solid foundation for your future business career in a globalized world.

Depending on where you obtained your university entrance qualification (or depending on your German language skills), you will be assigned to a National Track or International Track. Both tracks differ mainly in terms of language teaching and the 5th semester.

You will find the following information for each module in this module handbook: Information on the module code of the respective module, number of credits to be awarded, information on workload and group size;

- Information on the content, learning objectives, teaching method, form of examination, (content-related) participation requirements and the main teacher responsible for the individual course;
- Initial literature references and the required or target language levels.
- (Formal) regulations and examination requirements can be found in the General Examination Regulations (Allgemeine Prüfungsordnung) and the Subject Examination Regulations (Fachprüfungsordnung); these take precedence.
-

We wish you a successful, instructive and enjoyable period of study.
